

SPORT PROTECTION HOCKEY

Protection is our Profession

Protection is our Profession

Since 2001 ORTEMA takes care of the players with the German eagle on their chest and is official partner of the German Ice Hockey Federation. Furthermore we are the official partner of the IIHF for over 12 years now and also present on site at the big events and World Championships. This enables us to administer quick help to the top athletes of all teams. The athletes know that they can always rely on our team to one hundred percent.

Through this long-standing collaboration, we were able to acquire a lot of know-how and experience regarding the technical treatment of sports injuries. As a result of our international contacts with various associations, teams and national teams we have been able to develop bandages, braces and protectors that set high standards regarding functionality and anatomically correct design.

X-FOOT

Padded Sock

Version „Soko“ - Use in the acute
Phase for Problems on the Instep

NEU

Soko

Donut

X-Foot Padded Sock

The integrated pads distributes painful pressures and strokes evenly and dampen these impacts. The Stocking is easy to put on the foot. The integrated pads can be brought into the desired position, absorbs painful pressures and blows to the front of the foot (Version front) and the region of the Achilles tendon (Version back) and reduces these. The version inside and outside protects the inner and outer ankle. Due to the thinly design, the sock can be worn without problems in a tight-fitting skates, shoes or boots that go above the ankles. Thereby it relieves sensitive bony regions. Universal size.

Support the
foot perfectly

3 central points for optimal
power transfer and stabilization:
big toe, little toe, heel

Orthopedic sport insoles

Sport insoles can help to relieve pain, help with overloads, correct foot deformities and post-injury problems. The general performance of the feet can be influenced positively, length differences be compensated and pain be eliminated.

Standard version

refabricated shoe size; support by the excellent bedding the foot in its function optimally

Sizes: 39 - 48

Standard 1 pair 59.90 €

Customized sport insoles are fitted to the individual needs and anatomy of the athlete's feet.

Individual fitting min. 108.00 €

Swede-0 ankle bandage

This ankle bandage has reinforcements on the sides and helps to stabilize and guide the joint after distortions and/or ligament ruptures. As it is made of a very thin material there are no problems wearing it in sports shoes or skates. Very well adjustable due to the lace tightening system. If necessary the reinforcements on the sides can be removed.

Sizes: Shoe sizes 35 to 48; can be worn on the right and left.

Swede-0 **1 pc.** **109.00 €**

X-Socks Skating

The air flow enables humidity to dissipate quickly and the tighter knit ankle region lightly supports tendons, ligaments and the muscles, thus supporting the whole ankle. A shin pad is integrated which softens and absorbs the force of blows to the lower leg.

Sizes: Shoe sizes 35 to 47 (EUR)

X-Socks **1 pair** **29.00 €**

- ▶ Effectively reduce painful blows
- ▶ Comfortable donning and doffing
- ▶ Proven in all areas

Skate-Guard

Specifically designed to protect the feet of hockey players against pucks or various blows. Made of especially lightweight and impact-resistant polycarbonate. Available in the size ranges 5 - 8 and 9 - 13.

Skate-Guard **1 pair** **119.00 €**

**Proven in
training and match**

The **skate guard** can be individually manufactured and optimal adapted to the skates.

Individual fabrication
1 pair **189.00 €**

"For many years now, I've been able to depend on the support and high-value products from ORTEMA. They function well and I can wear them comfortably without seeing my ability to move be compromised. This allows me to focus completely on the training and the games."

**Marcel Goc, Hockey National Player
Silver medal winner 2018**

KNEE BRACE

Carbon Fibre and Titanium

*The #1
knee brace*

The individual carbon fibre knee brace going unnoticed while doing sports

KCOM
by ORTEMA

K-COM

by ORTEMA

KNEE BRACE

Partially flexible thigh and lower leg shells. Only 1,5mm thick shells in sandwich construction.

Optimal anatomical fit. Ensures optimal comfort.

Torsion-resistant, non-slipping carbon fibre construction. Proven under extreme loads in competitive sports.

Polycentric joints made of titanium. Flat, light and extremely stable.

Flexion and extension limitation. Can be adjusted individually.

Extremely light, yet stable. Due to minimum weight, the knee joint is stabilized to the maximum.

Counter-rotating safety closure system. Enabling the K-COM knee brace a non-slipping fit without adding to unnecessary thickness.

Carbon fibre and titanium

"The treatment of our players at national and international events is extremely important to us to be able to react quickly in the case of an injury. At the World Championships all participating nations profit from the unique service this extraordinary cooperation with ORTEMA offers."

Franz Reindl,
President of the German Ice Hockey Federation

K-COM Knee Brace

carbon fibre **knee brace** with titanium knee joints made from a mould

Indications:

- Injury of the anterior cruciate ligament
- Injury of the posterior cruciate ligament
- Injury of the collateral ligaments and meniscopathy
- Complex instabilities
- Cartilage damage and atrosis

and **100% customized**. It can either prevent knee injuries or be used after injury of the cruciate and/or collateral ligaments, knee surgery and osteoarthropathy. The **K-COM** distinguishes itself by its perfect fit, extremely low weight with high stability and very important for the players: no slipping.

The thin structure and high wearing comfort round up the brace's qualities.

K-COM 1 pc. Price on request

Manufacturing of the K-COM Knee Brace

1. The plaster mould is the most exact method of obtaining a model of the athlete's leg. The anatomy is duplicated to 100 %.

2. To obtain a perfect fit the centre of rotation of the knee joint is exactly measured and the model altered appropriately.

3. The joint splints are made of a titanium material. These are integrated into the carbon fibre construction which enables a very thin and light shell of the brace combined with a maximum of stability.

4. Every K-COM knee brace is manufactured and fitted by technicians with years of experience. This enables every patient to get the brace made to suit his individual needs.

XPERT
by ORTEMA

KNEE BRACE

Special plastic

The X-PERT knee brace is not an orthopedic aid and has no approval by health funds. It is not designed for the treatment of knee injuries, but rather conceived solely as a preventive aid.

X-PERT Knee Brace

Special plastic orthosis, as an inexpensive version for athletes to protect their knee joints. It is offered in 3 sizes (S, M and L). The X-PERT provides high stability at a low weight. A comfortable upholstered material prevents slipping and offers a high wearing comfort. The polycentric orthotic joints are made of a high-quality titanium and

imitate the natural behavior of the knee joint.

Sizes: The knee circumference is measured with the leg in full extension, strained musculature (while pulling the toes upwards). Additional measure: 20 cm above the patella (see size chart).

Sizes: S, M, L, XL

X-PERT 1 pc. (S) € 475.00

X-PERT 1 pc. (M-XL) € 495.00

Size	Knee circumference	Circumference thighs (15 cm above the patella)	Circumference lower leg (15 cm below the patella)
S	28 - 33 cm	35 - 41 cm	26 - 30 cm
M	34 - 37 cm	41 - 46 cm	30 - 34 cm
L	38 - 42 cm	47 - 54 cm	34 - 39 cm
XL	42 - 46 cm	54 - 60 cm	38 - 44 cm

Individual Goalie Pads

The individual Goalie Pad by ORTEMA, specially designed for the needs of goaltenders. Optimal protection with good anatomical fit and non-restrictive freedom of movement. The thigh is protected by a carbon fibre frame. In the region of the knee joint a knee cap made of an extremely durable plastic is adapted. The foam inliner significantly cushions blows and due to its flexibility adapts to the contour of the leg.

Individual fitting 1 pair 499.00 €

Knee Brace Stocking

Carrying the moisture under knee braces quickly away from the skin.

Sizes: 39 - 42, 43 - 46.

„MX-Socks“ 1 pair 34.90 €

Model „Airmax“: Particularly thin and elastic version. One size fits all.

„Airmax“ 1 pair 15.90 €

Model „Müller“:

Stronger version with additional silicon coating for even better skin contact.

With climate controlling features

GENU-HIT Knee Bandage

Has spiral stays on the sides and an additional silicon ring around the patella. It stabilizes and relieves stress due to the circular compression. This support has a practically bunch-free, perfect fit in the region of the back of the knee. Main indications for the bandage are posttraumatic inflammation of the knee and gonarthrosis.

Colour: black / silver

GENU-HIT 1 pc. 79.00 €

GENU-TEX Knee Bandage

The dynamic textile knee brace with polycentric knee joints splints is ideal for the stabilisation of the knee joint by collateral ligament damage or meniscus injuries.

Genu-Tex 1 pc. 449.00 €

Patella Pro

The patellofemoral pain syndrome (pain behind the knee cap) is a common cause for pain in the anterior section of the knee. For a number of various mechanical reasons, the knee cap can shift in a painful manner towards the outside. This is where the Patella Pro comes in: It guides the knee cap when bending and stretching the leg. The special mechanics of the brace ensure that the Patella Pro only protects to the degree necessary.

Patella Pro 1 pc. 319.00 €

LITE	1 pc.	49.90 €
PRO	1 pc.	54.95 €

X-Pants LP

These tight-fitting pants are made of a material allowing for humidity exchange and protectors that allow for the full range of movement whilst protecting the region of the hip. Due to the tight fit combined with very good wearing comfort there is practically no slipping of the protector pads in the case of a crash. With coccyx protector.

Sizes: S, M, L, XL, XXL

Please indicate your waist circumference.

Without additional rear inlay	1 pc.	79.00 €
With additional rear inlay	1 pc.	89.00 €

ORTEMA Power Shorts

Compression shorts with integrated X-diagonal stabilization system. The tight-fitting pants made of breathable material, allows a relief of the tendon attachments in the groin, on the other hand, a stabilization of the hip. This leads to pain relief and relief in training and competition, especially in intense and explosive movements.

Sizes: S, M, L, XL

Power Shorts	1 pc.	€ 69.00
---------------------	--------------	----------------

Version "Low" (height at the back 16 cm)

Version "High" (height at the back 24 cm).

Lumbo-X Kidney Belt

Stabilizes and protects the lower part of the spinal column; can also be used for pain and tension. The technical structure was designed out of

sport orthopedic viewpoints. It mainly consists of a meshmaterial that guarantees an up to 80% improved humidity exchange. Integrated stabilizing belts provide a perfect fit.

Colours: black ■ red ■

The integrated, additional stabilization straps are individually adjustable and ensure a perfect fit in any situation.

Sizes	circumference waist
XS	up to 73 cm (for kids - height at the back 13 cm)
S	up to 83 cm
M	up to 93 cm
L	up to 103 cm
XL	up to 118 cm
XXL	up to 118 cm

Low - 16 cm	1 pc.	49.90 €
High - 24 cm	1 pc	54.90 €

- ▶ Protects and stabilizes the lumbar spine during hard strokes in training and competition
- ▶ Integrated, patented link chains with overstretch protection relieve the entire lumbar area
- ▶ Wide adjustable Velcro® closure
- ▶ Additional straps support and ensure a perfect fit
- ▶ Made of breathable mesh material

EHC back protector

Rib Protection Shirt

The compression-shirt fits perfect, provides a good humidity exchange, is easy and convenient to wear and does not restrict the freedom of movement. The Gel-to-Shell technology transforms within minutes, the soft gel pads into a individual adapted protection. The inserts can be simply pushed into the the pockets of the shirt. The shirt is at 30° degrees, the removable Protectors-insert by hand washable. Has to be air dried.

Size	Chest circumference
L	100 up to 111 cm
XL	111 up to 122 cm

Rib protection 1 pc. 199.00 €

P1 EHC Back Protector

The **P1 EHC** is ideal for defenders. He can reduce the dreaded blows in the sensitive back region. The CE-approved protector **P1 EHC** provides superior comfort with minimum weight. This is possible using a new memory foam concept that can absorb forces well and degrades energy by material deformation. The breathable mesh material on the inside provides good ventilation. The **P1 EHC** is due to body heat very flexible and adapts to the contours of the back seamlessly. The protector provides extreme strong damping and has proven itself also very well in ski sports. The cover is removable and washable.

Back protector 1 pc. 139.00 €

VIEWTEC VISOR

ORTEMA VIEWTEC VISOR

Thanks to a special manufacturing procedure, the **ORTEMA VIEWTEC VISOR** prevents the interior of the visor from fogging up and guaran-

tees better vision. Available in the **PRO CUT** version (shorter styling in the cheek region).

PRO CUT 1 pc. 49.00 €

- ▶ **Antifog - coating** - no maore fogging of the interior of the visor
- ▶ **Anti scratch - coating** - guarantees better visibility
- ▶ **No additional cleaning** - with chemicals or detergents necessary
- ▶ **More safety** - thanks to better visibility and positioning of the visor

Mouthguard

Customized mouthguard with a very comfortable fit to enable easy breathing for the Athletes and does not restrict talking and drinking. By a gel-like mass that sets quickly, but remains elastic, the mouth guard can be optimally adapted to the maxilla. All materials are absolutely suitable for physical contact.

Customized mouthguard

Mouthguard 1 pc. 19.90 €

MADE
IN ORTEMA
GERMANY

Carbon Fibre Shoulder Brace

is individually manufactured and made of carbon fibre. It can be used for the prevention of injuries such as the treatment thereof after operations. A shoulder brace that is suited for extreme sporting activities. Since it is very light it ensures a high wearing comfort. The adjustable straps can limit the movement of the upper arm

Version carbon fibre on request

Version made of polyethylene
Prefabricated, but customized.

Version polyethylene 1 pc. 399.00 €

Omo-Hit Shoulder Bandage

is mainly used to stabilize the shoulder and upper arm after contusions and/or contortions. The light elastic material guarantees a high wearing comfort

Sizes: R (Right) or L (Left)

Size	Chest circumference
S	up to 92 cm
M	92 - 102 cm
L	102 - 115 cm
XL	more than 115 cm

Omo-Hit 1 pc. 199.00 €

Elbow Brace

Customized plaster cast manufactured out of carbon fiber; Use in injuries and after surgical interventions by the elbow. The elbow orthosis stabilizes the joint effectively and can be adjusted for their specific use. Through their low weight it provides exceptional wearing comfort. The webbings are able to limit the static and dynamic arm movements.

Elbow brace 1 pc. price on request

Elbow Bandage

with silicon pads to protect the elbow tip. To be used after contusions, irritations, surgery or to protect the elbow joint and synovial bursa. It ranges from the mid lower arm to the mid upper arm. Since it is anatomically formed there are no problems of pinching in the crook of the arm.

Size	Elbow circumference
S	up to 26 cm
M	26 cm - 28 cm
L	28 cm - 30 cm,
XL	more than 30 cm

Elbow bandage 1 pc. 89.00 €

Our Strength: Individual

Care after Injuries

ORTEMA Fracture Brace

The plaster cast orthosis is **custom made** out of carbon fiber. It is used for injuries and after surgical procedures in consultation with the doctor. The orthosis is suitable

for all sports and is adapted to the particular purpose.

With its low weight it offers a good wearing comfort. A special neoprene coating can protect the opponents. The thumb brace prevents hyperextension of the thumb and stabilizes the ligaments.

It also can be made individually from a special plastic. The athlete holds the hand in position while the plastic hardens, to ensure a perfect fit of the brace.

Fracture Brace 1 pc. min. 149.00 €

Leather Wrist Brace with Thumb Strap

This support made of leather accommodates for the anatomical contours of the hand whilst wearing. It stabilizes the wrist joint and base of the hand and due to the characteristic of this raw material it is very comfortable to wear. The thumb strap can also be removed in case not needed. The brace can be obtained either with or without a leather inlay.

Size: Wrist circumference

With leather inlay 1 pc. 79.00 €
Without leather inlay 1 pc. 46.90 €

Finger Brace made of Synthetic Mate

The finger brace is made of a specific thermo mouldable synthetic material that can be moulded directly onto the body. According to the injury the specific region of the finger can be stabilized and/or protected. Due to this fact the brace can be functionally adjusted to allow the player to hold the Hockey stick even though injured. The material is perforated, this provides an air circulation.

Finger brace 1 pc. 26,00 bis 150.00 €

Wrist Guard Impact Protection

Protects the wrist against unavoidable blows. The impact protection can be easily worn under the glove. The gel-to-shell technology transforms the soft insert in a few minutes into a customized protection. The insert can be easily pushed into the inside pocket of the wrist guard, which is hand washable. Has to be air dried.

Size wrist circumference

L 17 up to 20 cm

XL from 20 cm

Wrist guard 1 pc. 49.00 €

Sheet Material

This thermo-mouldable material enables the team doctor or physiotherapist to make individual finger braces as required. The material is heated in a steam bath and can be moulded directly on the skin. The sheets have a size of 20 x 20 cm and are available in different thicknesses, colours and perforations.

Sheet material 20 x 20 cm 24.00 €

2XU SPORT Compressions

Sets new standards regarding sports compression garments. Regardless of whether you are active doing skating, skiing, moto-sport, running, cycling or other sporting activities where the muscles have to perform at a high level the **2XU** Compression guarantees extra support and safety.

The graduated compression of the garment is fundamental to remove all the waste byproducts the body produces during high active sport, which cause fatigue.

The extra push of blood from the ankles towards the heart allow you another level of performance and the ability to perform longer with less fatigue.

The advantages:

- ▶ quicker recovering
- ▶ better oxygen flow
- ▶ delayed fatigue
- ▶ being less vulnerable to injuries
- ▶ better body awareness
- ▶ good moisture removal

Available as shorts and tights version
